

De Dietrich Thermique Supplier web portal guide

Introducing the new delivery planning

1. Provided delivery planning on our suppliers web portal

Each supplier which works with DE DIETRICH THERMIQUE has access to our supplier's web portal to the following web address:
<http://suppliers.dedietrich-thermique.fr/index.php>

DE DIETRICH THERMIQUE Purchasing department provides a login and password to each supplier:

De Dietrich Thermique

Pour accéder au site, entrez votre login et votre mot de passe.
To access the website, enter your login and password.

Delivery planning files are updated automatically every workday and are available on the web portal at 06:00 AM (Paris time).

The web portal hosts the files from the current day.

Supplier has to connect everyday to download the updated files.

The web portal is the mean way to share any recurrent document with our supplier. In particular, a contact list is provided through the web portal.

2. Introducing the new delivery planning

To reach the delivery's program, click on tab "Programmes de livraison / Call off". When this page is open, each supplier has access to different delivery planning available on this portal (different files are available: PLL, PLS or PLK).

De Dietrich Thermique - Programmes de livraison / Call off

Vous trouverez sur cette page les fichiers suivants / You will find following files on this site :

- ERP list uploadable / plan d'appro chargeable dans votre ERP => fichier / file : PLL*
- Call-off map / Synthèse des besoins ferme et prévisionnel => fichier / file : PLS*

Fichiers / Files	Type	Taille / Size	Date
PLL0000300735-5520150035-20151020-033609		39,59 Ko	20/10/2015 04:35:01
PLK0000300735-5520150035-20151020-034935		13,09 Ko	20/10/2015 04:35:01
PLS0000300735-5520150035-20151020-033609		9,60 Ko	20/10/2015 04:35:01

Each delivery planning is provided in 3 files:

- PLL : « *Programme de Livraison en Lignes* », with delivery call-offs in a basic list to allow an easy and automated upload
- PLS : « *Programme de Livraison Synthétique* », which is a synthetic chart of delivery call-offs to provide a quick and easily-readable overview of our requirements and let the supplier anticipate potential shortages
- PLK : « *Programme de Livraison Kanban* », which correspond to a list of firm kanban calls to be delivered

Files do always have the same name structure:

- Begins with the type of file : PLL, PLS or PLK
- Supplier's code within De Dietrich Thermique : for example 123456
- Delivery planning number : for example 5500000123
- Edition date and time : for example 20151026-151029 (YearMonthDay-HourMinutesSeconds)

3. Introducing e-kanban call-offs

In our delivery plannings, components called through e-kanban are affected to positions starting from 50 000 to distinguish them easily.

Starting electronic kanban involves that PLL and PLS files are updated with an additional column to provide an explicit information about call-off mode, either planned delivery or pulled by kanban call-off.

Moreover, regarding components called through e-kanban, all quantities mentioned in the PLL and PLS files are only forecasts and can in no case be considered as firm requirements.

1) PLL file

PLL file being made to allow automated upload of call-offs in supplier's ERP, each line of the file corresponds to a delivery call-off.

Data are shown on 12 columns:

- Delivery planning number
- Delivery planning position
- De Dietrich Thermique item number
- Item description
- Supplier item number if it has been provided to De Dietrich Thermique
- Delivery due date **in Mertzwiller**
- Required quantity
- Order type : firm call-off when marked with « X », or forecast if cell is empty (no « X »)
- Call-off type : planned delivery or kanban call-off
- Last goods' entrance which was delivered
- Last delivery's date
- Number of delivery note

After 20 days splitted in days, requirements are aggregated in weeks and months, and dates shown correspond to the first workday of the given period.

2) PLS file

PLS file is built to allow a quick and easy analysis of our requirements, so that the supplier respects the delivery dates and quantities, if necessary by anticipating productions.

For each position in the delivery planning are provided several informations:

- De Dietrich Thermique item number
- Item description
- Supplier item number if it has been provided to De Dietrich Thermique
- Delivery planning position
- Call-off type : planned delivery or kanban call-off
- The material planner in charge
- Quantity in backorder (detail of concerned call-offs available in PLL file)
- Requirement per period, in total and detailed per item
- Firm call-offs are marked with « * », whereas quantities shown without are forecast and may vary.

3) PLK file

PLK file is dedicated to provide firm call-offs for items supplied by kanban. It will be provided through the web portal, in the same way as PLL and PLS files.

For each call-off are given several informations:

- Delivery planning number
- Delivery planning position
- De Dietrich Thermique item number
- Item description
- Supplier item number if it has been provided to De Dietrich Thermique
- Delivery due date **in Mertzwiller**
- Required quantity
- Call-off type : always firm for kanban call-offs
- Kanban card number to supply
- Kanban full identification, to be used at goods receipt
- Kanban empty identification, to be used when consuming the material on production line

	A	B	C	D	E	F	G	H	I	J	K

4. Kanban tab

You will find Kanban card in PDF format to be used for the firm kanban calls to be delivered and visible in the PLK file (PLK file present under the tab “Programmes de livraison /Call off” → for example: PLK0000307060-5520150038-20151109-035204). It corresponds to an unique file per contract’s number and order’s delivery date for the PLK file.

To get the kanban card of an order, you have to:

- Go on “Programmes de livraison /Call off” tab
- Click on the PLK’s file (for example: « PLK0000307060-5520150038-20151109-035204 »)
- You will see the file like the example hereunder:

	A	B	C	D	E	F	G	H	I	J	K
1	Procur. Planning	Position	Item no.	Item description	Supplier code	Delivery Date	Quantity	Firm Order	Kanban Number	Kanban Full	Kanban empty
